introducing the e:line kitchen collection

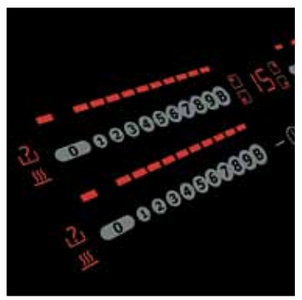
Today, the kitchen takes centre stage as the focal point for guests when you entertain. It has evolved beyond the purely functional, into a space that reflects taste and personality. The modern kitchen is where passion is turned into cuisine.

With over 90 years experience in homes and leading restaurants around the world, Electrolux understands this and has created the Electrolux E:Line collection to take the kitchen into a whole new realm.

All individual appliances in the E:Line collection are designed to complement each other. Clean lines, horizontal pewter-toned glass bands and stainless steel exteriors blend to create a visual harmony.

This harmony is the result of a global design brief. Our designers from around the world worked closely with leading international kitchen architects to create a fresh, sophisticated look. The result – appliances that will create the perfect environment for both entertaining and stylish everyday living.

Every aspect of the Electrolux E:Line collection is easy to use. By marrying design simplicity with intuitive features, we've put you firmly in control of your kitchen.



IOI® intuitive oven interface

In order to make cooking easier, we watched how people use their ovens in real life and learnt from chefs who use programmable cooking. By doing so, we have removed complexities and designed our ovens to be intuitive to use. We call this IOI® – Intuitive Oven Interface.

IOI® Intuitive Oven Interface

so what does it really mean?
The genius of IOI® makes the oven so easy to control you won't need a manual to use it. No more of those controls, applications and symbols that become so confusing even the clock is left unset.

intuitive by design
IOI® lets you operate the oven intuitively from left to right, pushing buttons across the controller, with clear wide screens displaying simple words, rather than confusing icons.

Once the function is selected, the recommended temperature is automatically displayed, which can be changed instantly to suit your personal cooking styles.

As well as a standard countdown timer function, you can also program what time you want your meal to start cooking and when you want it to finish. Simply add your food and walk away. Cooking will commence as programmed, rewarding you and your guests with more consistent and impressive results – free of stress or extra effort.

The IOI® Intuitive Oven Interface puts you in control

electrolux e:line ovens – so intuitive, no manual required

Elegant, intuitive and contemporary – the oven is the centrepiece of the kitchen.

Your natural affinity with style and beauty will draw your attention to the ovens in the Electrolux E:Line collection. They exhibit the same clean horizontal lines, signature design elements and ease of use as the other appliances in the E:Line collection.

designed for you
Everyone's cooking needs vary. With single, duo or double electric ovens we cover them all. The large capacity of the 80 litre oven will make catering for every occasion quick and easy, while energy use is kept to a minimum – meeting Europe's highest energy standards (EN50304).

coolest temperature yet
The latest E:Line oven doors are not only better in quality and design but deliver our coolest temperature yet. They are cooler to touch, therefore making them safer and keeping the kitchen cooler. The glass door is even easier to dismantle for easy cleaning.

removable racks & telescopic runners
Designed with you in mind, the new oven racks & telescopic runners simplify managing your food. Now with eleven shelf positions, you will always have the optimum position available for the best cooking results. We have developed our roasting dish to be deeper and its new rack elevates the meat and helps heat circulate the food more effectively.

chemical-free easy cleaning
The Electrolux E:Line Pyroluxe® oven brings new convenience to cleaning. Simply select one of the three pyrolytic cleaning functions and the oven heats up to a temperature that turns grease and organic residues to ash. The oven cavity when cool is then easily wiped clean.

unique appliances, compact design

Electrolux compact range is designed to beautifully integrate with the E:Line kitchen collection. Each component shares the same sophistication in design and innovation to complete the E:Line vision of seamless harmony.

Designed to integrate seamlessly with the E:Line range of ovens, this specialised range of compact kitchen appliances will free-up your bench space, save you time and give you the opportunity to entertain with flair. Combine your products together for a truly unique look.

compact combination steam oven
Professional cooks have known the benefits of steam cooking for many years, with food looking great and tasting superior.
Tetsuya Wakuda, world renowned chef and Electrolux cooking ambassador, regularly uses steam to create the pure, clean flavours he is famous for.
Incorporating all the features of a full sized oven with the added benefits of steam cooking and grilling, the compact combination steam oven offers 8 cooking functions for complete flexibility while the steam cleaning option keeps your oven in pristine condition.

compact combination oven
This perfectly styled compact oven is a fully multi-functional fan forced oven and grill, with the speed and benefits of a microwave. It bakes perfect meals up to 60% faster than traditional cooking methods. Features 12 automatic functions, 5 oven functions and simultaneous cooking on two levels.

compact built-in microwave
This stunning built-in microwave will keep your bench space clear for food preparation. It combines microwave functions with the benefits of grilling and features 10 automatic programs and 2 oven functions.

built-in espresso machine
Bring café culture to your kitchen with this fully automatic, built-in espresso machine, the perfect accompaniment to the compact range of ovens. Touch controls allow you to easily create cappuccinos, lattes, tea and other hot drinks while the intuitive display reminds you when coffee or water levels are low.

simple cooking, stunning design

The Electrolux E:Line built-in and countertop microwave ovens are beautifully designed to seamlessly integrate into the E:Line kitchen collection, sharing the same sophisticated style and intuitive features.

perfectly finished dishes
The Electrolux E:Line microwave ovens feature convection, microwave, grilling and a combination of cooking modes to allow quick preparation of a variety of dishes. Meals can even be browned or crisped for a professional finish.

from frozen to delicious in one step
Multi-staged cooking uses precise power levels at different stages in cooking, to cook food from frozen to finish in the one function.
Delayed start allows you to set a time for your microwave to cook a meal so it will be ready for you, when you are ready to eat.

true built in solution
The Electrolux E:Line built-in microwave oven highlights the cooking credentials and thoughtful detail to professionalism expected of the Electrolux brand.
The integrated trim that houses the microwave oven is functionally designed to vent heated air directly out of your cabinetry, preventing condensation and moisture build-up.

simple cooking
Auto cook allows for a variety of popular foods such as fish, chicken, vegetables and rice to be cooked quickly and simply.
If you want to reheat food fast, auto reheat will choose the ideal reheating time at the touch of a button.

tetsuya wakuda cooking authority

Ever since Tetsuya Wakuda started cooking at his tiny restaurant in Sydney's Rozelle in 1989, he has been showered with accolades. He is part of an elite group of international chefs that has influenced other chefs through their personal styles and unique approaches to food. His culinary philosophy centres on pure, clean flavours that are decisive, yet completely refined. His amazing technique, Asian heritage, sincere humility, worldwide travels and insatiable curiosity combine to create incredible, soulful dishes that exude passion in every bite.

Tetsuya's exquisitely refined cooking has long attracted devotees from around the globe; indeed, more than half of his restaurant's bookings are made from overseas. And although he travels extensively, he can still usually be found, sleeves rolled up, at the stoves in Kent Street.

Tetsuya, in turn, has long been a devotee of Electrolux appliances, and his private master kitchen at the restaurant is equipped with the original Electrolux Ebony collection.

"I've known the company for years and I've been using Electrolux equipment ever since I started in Rozelle. In Europe it's one of the most popular brands for commercial kitchens, and for the home cook it offers the same durability, reliability and ease of cleaning needed on a large scale in restaurants. Induction cooking has been around a long time, so it's tried and tested. It cuts down on radiant heat – which keeps commercial kitchens cooler – so it's perfect for Australian conditions."

Although Tetsuya jokingly describes himself as the 'gadget king', he stresses that success in the restaurant means being consistent. "I need equipment that will give me the same result each time. For example, say we're poaching ocean trout in herbs and olive oil at a low temperature, we know that every time we do this using induction the result will be the same – perfect – which is essential for restaurant cooking. With induction, the heat is consistent across the entire base of the pan. You go to Alain Ducasse's kitchens and he's using an induction wok – far more efficient and quicker than gas!

"It's also about cutting down the time you spend cleaning up. If something boils over, it's just a matter of wiping down a surface – which means you need fewer chemicals for cleaning."

Tetsuya is noticing the increasing awareness centred on health and well-being issues in Europe, something he feels is mirrored in Australia.

"At the restaurant our cooking is definitely European, with our own touches, of course, to make it interesting. It's Mediterranean really – we hardly use any butter or cream; certainly not in our savoury cooking, when we use mostly olive oil. For us, the healthy choice we make is in the produce. We use organic ingredients as much as we can, and we like to know where our produce comes from, how it's been reared or grown, by producers who care" he explains.

"Everyone's so busy nowadays that people tend to eat out more during the week. But I think the weekends are different, and that the kitchen is increasingly becoming the heart of home life, where you can relax with family and friends. You can see it in the way kitchen design is changing – open-plan living rooms that centre around the kitchen, where you can chat over a glass of wine while you're cooking. So although the kitchen may only be used a few times a week, it needs to be more user-friendly, ergonomic, stylish and, most importantly, easy to clean! After you've been entertaining, you don't want to spend two hours in the kitchen cleaning up!" he laughs.

Overall though, Tetsuya sees a more fundamental shift, observing, "nowadays people are definitely more educated about food. Fifty years ago people ate to survive; now, increasingly, people eat to enjoy."

And those on the waiting list at Tetsuya's would be the first to agree...

By Sally Feldman – a freelance writer and copy editor on publications, including *The Weekend Australian*'s 'Travel and Indulgence' section, *Luxury Travel & Style* magazine, *Vogue Entertaining + Travel*, and ABC's *Delicious* magazine.

tetsuya's confit of petuna ocean trout
with fennel salad

350g (11oz) ocean trout, filleted
100ml (3½ fl oz) grapeseed oil
80ml (2½ fl oz) olive oil
½ tablespoon ground coriander
½ teaspoon white pepper
10 whole leaves basil
3 stalks thyme
¼ teaspoon finely chopped garlic
2 stalks celery, finely chopped
2 small carrots, finely chopped
3 tablespoons chopped chives
4 tablespoons konbu, finely chopped
½ teaspoon sea salt
2 tablespoons ocean trout caviar

fennel salad
¼ bulb fennel, shaved
1 teaspoon lemon juice
salt and pepper
½ teaspoon lemon oil

parsley oil
Leaves from ¼ bunch Italian parsley
100ml (3½ fl oz) olive oil
½ tablespoon salted capers, rinsed and drained

Skin the ocean trout and cut crosswise into 70–80g (2½ oz) pieces – they should weigh no more than 100g (3½ oz). In a little tray, immerse the ocean trout in grapeseed oil and olive oil with the coriander, pepper, basil, thyme and garlic. Cover and allow to marinate for a few hours in the fridge. If you do not want to use too much oil, paint the surface of the fish with oil and press on the herbs.

To cook the fish, first preheat the oven to the absolutely lowest setting possible. Take the fish out of the oil and allow to come to room temperature. Chop the celery and carrots and place on the base of a baking tray. Put the ocean trout on top and place in the oven. Cook with the door open so that the fish cooks gently. Paint the surface every few minutes with the marinade.

Depending on the size and thickness of the fish, cooking takes 7-8 minutes (no more than 10 minutes). When you touch the end part, your finger should just go through the flesh. The flesh should not have changed colour at all, but remain a brilliant orangey-red, and feel lukewam to the touch.

To make the parsley oil, purée the parsley with the olive oil in a blender. Add the capers and blend.

To make the fennel salad, finely slice the fennel on a mandolin. Toss with the lemon juice, salt, pepper and some lemon oil or lemon zest.

Remove the fish from the oven and allow to cool down immediately. Lift out of the tray and allow to come to room temperature.

Sprinkle the top of the fish with finely chopped chives, konbu and a little sea salt. To serve, place some fennel salad on the base of the plate. Put the ocean trout on top and drizzle a little parsley oil all around. Dot the ocean trout caviar at regular intervals, and serve.

To go with the dish, we suggest a complex chardonnay, such as a 1997 Leeuwin Estate Art Series, 1997 Kistler Chardonnay 'Durrel' or a 1997 Jean Boillot Puligny Montrachet 'Clos de la Mouchere'.

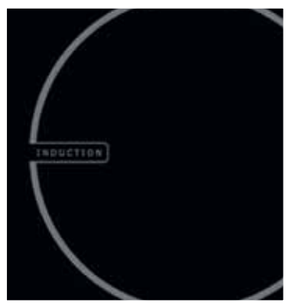
electrolux induction cooktops – safe, precise and powerful

Induction cooking will revolutionise your kitchen. No domestic cooking system heats faster, uses less power or is more precise and safe to use than induction – not even gas!

Precision perfect cooking is no longer a case of luck over good judgement. Exact temperatures can be reached and maintained easily. This greater precision enables you to do things like melt chocolate without it burning or to simmer special sauces without them boiling. Control is at your fingertips with induction cooking. The electromagnetic method of heat transfer utilised in induction cooking uses energy to maximum efficiency, conserving power. Unlike other cooking appliances there is virtually no pre-heating phase.

EHD68200P shown

bevelled sides



induction zones (EHD60100P, EHD60150P, EHD80170P only)

take the heat out of the kitchen
As there are no naked flames, the residual heat experienced with induction zones is substantially reduced, keeping the kitchen cooler and the food perfect. Naturally this means surfaces are much easier to wipe clean, as spilt food is not burnt onto the cooktop or surrounds.

Additionally, if there is no pot on the induction zone, the zone will not heat up, avoiding accidents that can occur when cooktops are left on. Simple to operate and elegantly designed, an Electrolux induction cooktop will fit seamlessly into your kitchen.

For people who like to mix the new with the classic, there's also the choice of a combination cooktop which combines state-of-the-art induction technology with conventional electric cooking.

how does it work?
Induction technology uses electromagnetic fields to transfer energy to the cooking pot which then converts into heat. The heat is generated at the base of the pan, not by a cooking element. In effect, this turns the pan itself into a hotplate and removes a significant amount of radiant heat from the cooktop surface. As a result, control is instantaneous.

suitable induction cooking utensils
You may not need to buy new cookware to enjoy the benefits of induction cooking. The simple test to see if your pots or pans are suitable for induction is if a magnet sticks to the base of the cookware.

stylish touch & slide temperature control
Electrolux E:Line induction cooktop surfaces now feature touch slide controls (except EHD60100P), to showcase the latest in innovative user technology for your kitchen. This impressive detail to design completes the sleek appearance of your cooktop, while giving you perfect temperature control. Simply slide your finger along the glass surface to change cooking temperature instantly.

maxisense induction cooking knows no boundaries

Electrolux innovation brings you two new induction cooktops which offer maximum cooking freedom and flexibility with professional results – for people who love to cook.

SINGAPORE DESIGN AWARDS 2010 GOLD #

reddot design award winner 2008 ^

ultimate flexibility
The maxisense induction cooktops are developed with three or four extra large induction zones, which detect pan presence and location and are not restricted to traditional circular zones. This allows pots of various sizes to be placed anywhere on the cooktop, provided they come into contact with the induction crosshair.
Large pans or pots can be placed horizontally across two zones (on the three zone model EHD90230P) or vertically (on the four zone model EHD68210P).

thoughtful design
The three zone maxisense has all zones and controls at the front of the cooktop. This eliminates the need to reach over hot pans, whilst making full use of cooking space.

jewellery for your kitchen
Induction cooktops can normally only handle pots and pans with flat bases. The Electrolux E:Motion Wok and Trivet set, however, provides induction through a curved surface, allowing for traditional Asian wok cooking on maxisense induction cooktops. Winner of the 2010 Singapore Design Awards, the E:Motion Trivet is as much a statement of style as it is of innovative functionality.

european style
The maxisense range is imported from Germany, finished in sleek black ceramic glass, clean bevelled edges and integrated electronic controls. Both hobs are perfectly styled to work seamlessly with the Electrolux E:Line range.

stop and go
The simple to use Stop and Go function gives you the ability to leave the cooktop on a keep warm setting if you are called away. When you are ready to start cooking again, by pressing Stop and Go, the cooktop will return to your previous setting.

EDEE63AS double oven with IOI® technology

electrolux e:line ceramic cooktops

The easy clean practicality of the Electrolux E:Line ceramic electric cooktop blends in perfectly with the E:Line kitchen collection.

sleek and stylish
The black ceramic electric cooktop gives the same sleek, stylish finish as the induction cooktop. It blends the traditional convenience of an electric cooktop with the unified look of the Electrolux E:Line collection.

flexibility and control
In addition to the four cooking positions, one element is a dual or triple zone cookplate, giving you 2 or 3 variable hotplates in one.

An extended zone on the EHET96CS gives you the flexibility to use rectangular cookware.

Simple touch controls at your fingertips make it easy to control the heat allowing you to concentrate on preparing the perfect meal.

easy to clean
The smooth black ceramic surface is tough and durable while being easy to maintain.

And being a completely flat surface maximises use of cooking space.

stop and go
The simple to use Stop and Go function gives you the ability to leave the cooktop on a keep warm setting if you are called away. When you are ready to start cooking again, by pressing Stop and Go, the cooktop will return to your previous setting.

electrolux e:line gas cooktops

If you love the theatre and spectacle of cooking, the Electrolux E:Line gas cooktops will ensure drama is part of every meal.

EHGC93CI shown

loved by many
Quick and responsive, gas cooktops are loved by many. The Electrolux E:Line gas cooktop range offers you the choice of sleek black ceramic glass or a stylish stainless steel base under cast iron trivets.

power to deliver great taste
For the ultimate in cooking performance and perfection the E:Line gas cooktops deliver high power focused heat, perfect for wok cooking and pan frying.

The simple but effective innovation of flattening the gas trivets or pan supports, results in pans being able to glide effortlessly across the cooktop without the trivets getting in the way. The E:Line range of gas cooktops feature flame failure sensors, which automatically turns off the gas to the burner if the flame goes out.

Some of the cooktops have the wok burner offset to enable more space on the cooktop, allowing you to be creative without compromising on cooking space.

electrolux rangehoods – clean lines, clean air, exceptional power

When designing your kitchen, the rangehood completes the story – the finishing touch for every modern kitchen. And with today's open plan kitchen designs, creating a clean quiet atmosphere is more important than ever.

Quieter kitchens make for more enjoyable entertaining

entertain without interruptions
Our new canopy rangehoods are designed to be whisper quiet and impressively powerful. You can enjoy entertaining without the distraction of cooking smells, smoke and unwelcome noise.

bold and striking or understated
Electrolux understands the need to create the perfect environment for entertaining and stylish everyday living. That's why our rangehoods are designed to complement any kitchen and reflect current trends.

A popular model, the canopy rangehood is styled to showcase your kitchen appliances. The new glass canopy rangehood presents a stunning alternative, its sleek contemporary fascia will flatter any kitchen interior.

The bold lines of the new stainless steel canopy rangehoods are striking and almost sculptural in appearance. Manufactured from stainless steel with a pewter-tone inlay, or stainless steel and glass, they flow harmoniously with the Electrolux E:Line kitchen collection. Their superior extraction and ultra quiet operation make them the obvious choice for those who seek the best.

If you prefer to keep your kitchen simple and minimalist, a fully integrated or slide out rangehood would suit your needs, as they are discreetly hidden within your kitchen cabinetry.

Sleek and stylish glass touch panel

Seamless integration across the entire E:Line range

realLife™ dishwashers more room inside, same size outside

Based on thousands of hours of consumer observation and interviews, we've designed a dishwasher for the way you really live.

In real life, we use unusually shaped dishes, glasses of different heights, professional pots and pans, in fact, anything but the conventional! Whatever the load, and however you load it, RealLife™ will give sparkling results every time, thanks to the FlexiSpray™ arm, with it's clever double-rotating action.

built for your lifestyle
From a fast and functional quick 30 minute program which gives a great wash to lightly soiled dishes in only half an hour, to the Intensive 70° program which removes heavy soiling.

energy saving technology
These dishwashers feature unique load sensing technology, which determines how much water is needed for each load. During the Auto program, turbidity sensors also detect the dirt level and adjust the wash cycle accordingly.
The AutoOff feature automatically disconnects your dishwasher as if it was unplugged 10 minutes after the cycle is over, eliminating energy consumption during standby mode.

XXL flexible interiors
With the XXL tub and adjustable shelves everything from large pots and pans to glasses of all shapes and sizes can be securely washed. The RealLife™ dishwasher is the ultimate entertaining companion.

e:line modular refrigeration professional styling to impress

The range of Electrolux E:Line Kitchen Collection appliances is the result of collaboration between our global designers and leading kitchen architects.

modular bottom mount fridge EBM5107SC-L with bottom mount fridge EBM5107SC-R

When you choose from the E:Line modular range, you experience the sophisticated styling of linear design and high quality stainless steel, creating a standout in any living space.

freedom to mix and match
By mixing and matching the 10 Electrolux E:Line modular fridges, you can create up to 25 combinations, to give you a customised refrigeration solution. Whatever your choice, as a single or modular combination, there's a model to perfectly match your living space and lifestyle.

reducing your footprint
The entire range of modular fridges now use R600a refrigerant so you can feel confident your refrigerator is creating less impact on the environment.

star performer
Setting a new standard for best in class energy efficiency with sophisticated styling, the Electrolux top mount fridges are the first in Australia to be recognised with a 4 star energy rating.

visual harmony across the E:Line kitchen collection

infinitely adjustable interiors

the mother nature of all fridges

e:line modular bottom mount fridge EBM4307SC-L with single door fridge ERM4307SC-R, dishwasher EX601SC

modular refrigeration features

modular configuration
The modular range allows you the freedom to mix and match 10 different fridge and freezer combinations to create 25 different options. This ensures there's a fridge to satisfy all of your food storage needs.

total control
Separate temperature controls allow you to get the perfect temperature in the fridge as well as the freezer.

handles that do more than open doors
The professionally inspired, sleek bar handles look exceptional in any living space. They are designed to take the effort out of opening and closing the fridge or freezer door.

innovative deli drawers
This compartment has independent chill outlets and is designed to isolate odours, providing storage for speciality food.

visual harmony
The Electrolux E:Line range of fridges, dishwashers and built-in cooking appliances will give your kitchen seamless style.

create the ideal environment
Humidity controls on each crisper create the ideal storage environment to keep fruit and vegetables garden fresh.

mark-resistant stainless steel
The invisible, mark-resistant coating helps protect the exterior of the fridge from everyday fingerprints and grime. This reduces cleaning time and helps keep the sleek appearance of your kitchen.

simply twist & serve
The ingenious twist ice server is an easy way to dispense ice. Store the frozen ice in the removable tray and freeze more – perfect for parties or everyday refreshments.

easy glide access
No matter how full the crisper and freezer drawers, easy glide telescopic runners ensures effortless access to your food.

energy stars
The modular range now features the first four star fridge in Australia. It uses superior components and a non-synthetic refrigerant (R600a) to achieve best in energy class efficiency. (ETM5207SC model only)

freedom to mix and match 10 models, 25 combinations

By mixing and matching the 10 Electrolux E:Line modular fridges, you can create up to 25 combinations, providing you with a customised refrigeration solution. Whatever your decision, there's a model or combination to perfectly match your living space and lifestyle.

classic e:line side by side superior styling, maximum storage

Make a statement in your kitchen with this ultra-stylish, ultra-spacious E:Line side by side refrigerator. Offering up to a massive 700L capacity, it caters to all your storage needs, and is packed with premium features to satisfy even the highest expectations.

The Electrolux E:Line large side by side shares the same sophisticated styling of linear design and high quality stainless steel finish of the Electrolux E:Line Kitchen Collection.

room to entertain
The impressive 700L capacity enables you to store large party platters with enough space left over to chill drinks. By utilising the slide away shelf, even the tallest items can stand up in the fridge, offering you maximum flexibility.

reducing your footprint
The classic side by side refrigerators use R600a refrigerant so you can feel confident your refrigerator is creating less impact on the environment.

easy glide telescopic runners in fridge and freezer

modular anodised wine caddy

convenient ice and water dispenser

compact e:line side by side professionally inspired

The Electrolux E:Line compact side-by-side shares the same sophisticated styling of linear design and high quality stainless steel finish of the Electrolux E:Line Kitchen Collection.

The dedicated fridge and freezer compartments, with large storage capacity, make it easy to organise your fresh and frozen food.

fits a standard 900mm space
The Electrolux E:Line compact side by side is cleverly designed to fit into a popular 900mm wide fridge cavity, so you can achieve a professional look without remodelling your kitchen.

reducing your footprint
The compact side by side refrigerators now use R600a refrigerant so you can feel confident your refrigerator is creating less impact on the environment.

large side by side ice & water model ESE6977SC

french-door with the perfect measurements

The new Electrolux French-door is the only one of its kind designed to fit perfectly into the popular 800mm wide refrigerator cavity. Stunning double doors open to a thoughtfully organised interior, where there's a place for everything and everything in it's place. Surprisingly accommodating, the Electrolux French-door is perfect for entertaining or stocking up on the week's groceries.

smart freezer lighting

deep freezer bins

The French-door design with the freezer at the bottom and fridge on top, gives easy access to everyday fresh food items. It means all your groceries are at eye level within easy reach, without having to bend over.

For busy people on the run, simply open one side to access daily items like milk and juice, or fruit from the crisper.

let food come to you
The freezer door gently glides towards you, presenting food in two deep, well lit drawers, making it easier to find your frozen items. Organise food into separate bins, each big enough to hold a whole chicken. And the soft touch self-closing drawer ensures the freezer isn't left open by mistake.

everything in its place
The Electrolux French-door makes the most of its interior space with thoughtful storage solutions. Adjustable door bins, handy deli drawers, individual crisper bins and a slide away glass shelf, ensures there's a place for food and drinks of all shape and sizes.

reducing your footprint
The Electrolux French-door uses R600a refrigerant so you can feel confident your refrigerator is creating less impact on the environment.

access the crispers with one door open

four-door an entertainer's delight, a gourmet's dream

The Electrolux four-door is a fridge of exceptional beauty, innovative design and absolute functionality.

The elegantly symmetrical four half-width doors require minimum space to swing open and are ideal for narrower kitchens and island benches.

It has an interior large enough to fit the biggest party platters. And with multiple drawers and compartments in both the fridge and the freezer, organising different fresh and frozen foods is simple.

a freezer for the organised
With seven slide-out freezer drawers there is a place for everything. The two doors allow you to separate your long-term frozen foods from the ones you use every day, and by reducing the amount of times you open each door, you reduce energy consumption and ensure optimum performance.

reducing your footprint
The four-door fridge now uses R600a refrigerant so you can feel confident your refrigerator is creating less impact on the environment.

extra wide fridge compartment

deep door bins

freezer with plenty of compartments

built-in refrigeration totally integrated, totally you

If you prefer to customise the look of your kitchen, then the Electrolux E:Line built-in fridge and freezer has been designed for you.

integrates with kitchen cabinetry

It allows you the freedom to choose your own exterior, integrating perfectly with the rest of your kitchen, to create a unique design with visual synergy.

a genuine solution
Unlike some existing sliding integration kits, this is a genuine 'built-in' solution, with no door alignment issues and a seamless trim finish.

reducing your footprint
These built-in models now use R600a refrigerant you can feel confident your refrigerator is creating less impact on the environment.

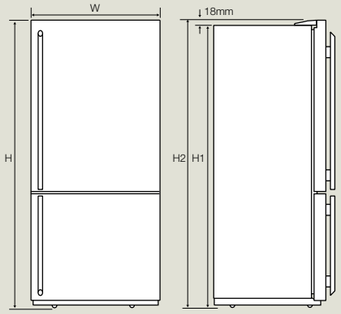
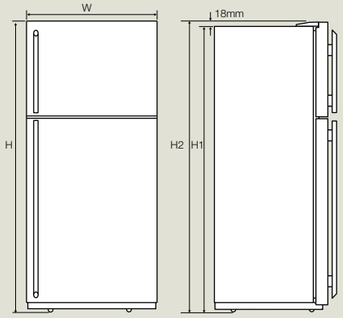
modular refrigeration

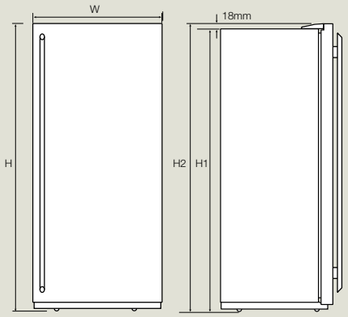
E:Line bottom mount fridge
EBM5107SC, EBM4307SC



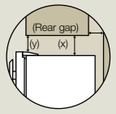
E:Line top mount fridge
ETM5207SC, ETM4407SC



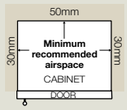
E:Line single door
ERM4307SC, EFM3607SC



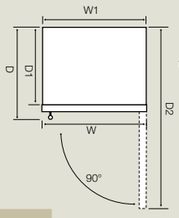
Minimum Recommended Airspaces

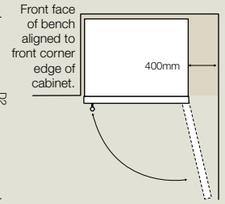


If you do not have a cupboard with a rear gap, the recommended clearance area on top increases from 50mm to 90mm (x) and from 32mm to 72mm (y).



Please note:
Doors are designed to sit proud of cabinetry (not flush).





When positioned in a corner area, spacing of at least 400mm on the hinge side will allow the doors to open enough to enable the removal of bins and shelves.

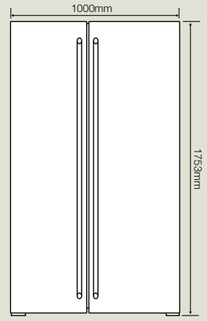
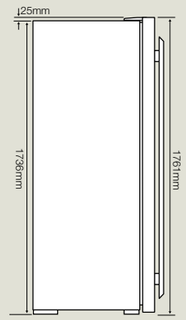
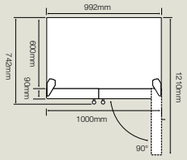
dimensions and installation guide

large side by side refrigeration

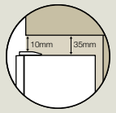
E:Line large side by side fridge
ESE6977SC, ESE7007SC

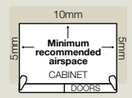




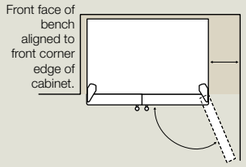


Minimum Recommended Airspaces





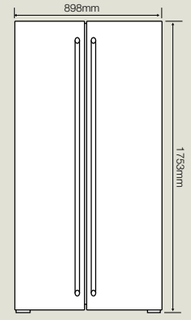
Please note:
Doors are designed to sit proud of cabinetry (not flush).

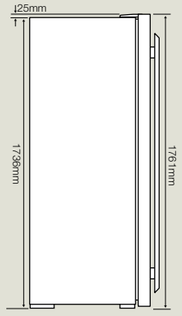


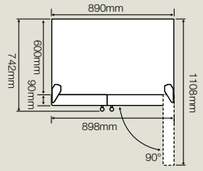
When positioned in a corner area, spacing of at least 350mm on the fridge side and 250mm on the freezer side will allow the doors to open enough to enable the removal of the crisper bins and shelves.

compact side by side refrigeration

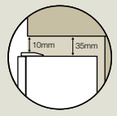
E:Line compact side by side fridge
ESE6077SC, ESE6107SC

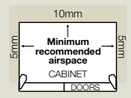




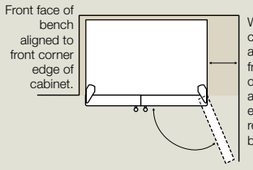


Minimum Recommended Airspaces





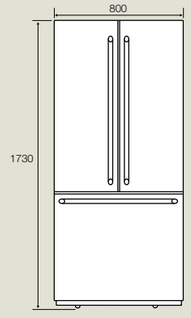
Please note:
Doors are designed to sit proud of cabinetry (not flush).

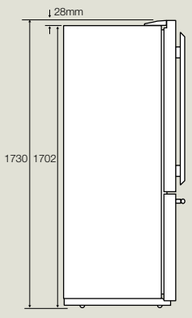


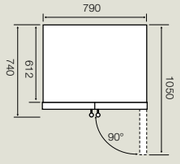
When positioned in a corner area, spacing of at least 350mm on the fridge side and 250mm on the freezer side will allow the doors to open enough to enable the removal of the crisper bins and shelves.

french-door refrigeration

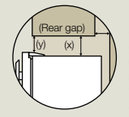
E:Line french-door fridge
EHE5107SA



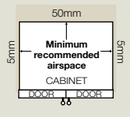




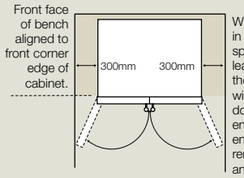
Minimum Recommended Airspaces



If you do not have a cupboard with a rear gap, the recommended clearance area on top increases from 50mm to 90mm (x) and from 32mm to 72mm (y).



Please note:
If 5 mm side clearance, the fridge cabinet must sit at least 5 mm proud of kitchen cabinetry for doors to open. A 5 mm side clearance requires 50 mm rear clearance and 50–90mm clearance above.



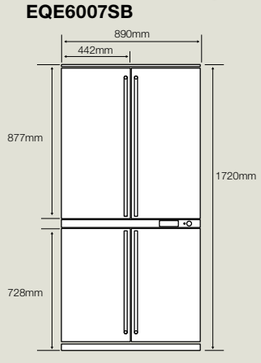
When positioned in a corner area, spacing of at least 300mm on the hinge side will allow the doors to open enough to enable the removal of bins and shelves.

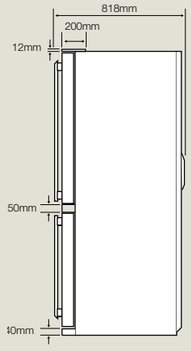
All measurements in millimetres.

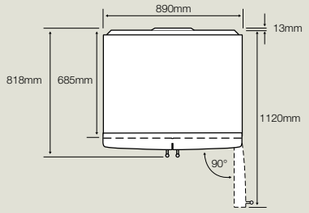
dimensions and installation guide

four-door refrigeration

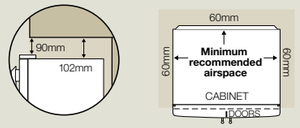
E:Line four-door fridge
EQE6007SB





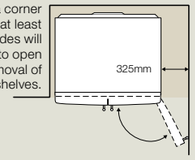


Minimum Recommended Airspaces



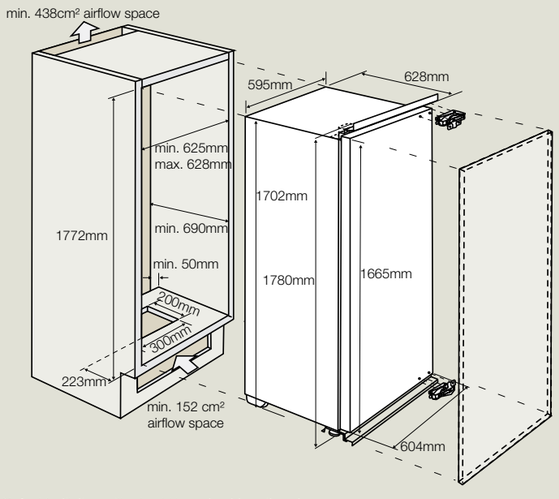
NOTE: Doors are designed to sit proud of cabinetry (not flush).

When positioned in a corner area, spacing of at least 325mm on the sides will allow the doors to open enough to enable removal of the crisper bins and shelves.



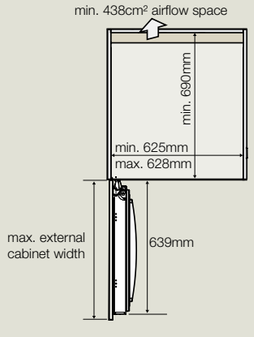
built-in refrigeration

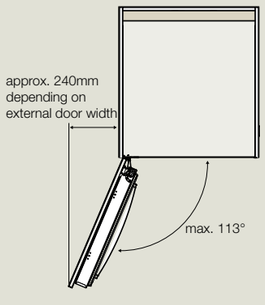
E:Line built-in fridge
ERM3701WC-X, EFM3001WC-X



- External dimensions depend on thickness of cabinet materials used.
- Cabinet door widths should not exceed total cabinet width to allow proper door opening.

NOTE: kitchen cabinetry is not included with the appliance





Note: Ventilation grille should be cut out to suit customer requirements with a minimum of 152cm² of cross-sectional area for ventilation grille airflow.

For detailed assembly instructions, refer to the installation manual included with the products, visit www.electrolux.com.au or call 1300 363 640.

All measurements in millimetres.

electrolux top service

Electrolux Top Service encompasses the after sales service including Delivery, Home Service and Spare Parts

Electrolux TOP SERVICE

delivery
The purchase of a new appliance is an exciting experience. Electrolux customers can, for an additional charge, choose to have their new appliance delivered by our experienced staff. This service, at the customer's option, includes the removal and recycling of packaging materials and even the old appliance if necessary. Delivery is available in Adelaide, Brisbane, Melbourne, Perth and Sydney. It may not be available in some rural locations and is not available in New Zealand.

home service
Home Service is provided for repairs to appliances by trained technicians. For repairs to appliances that are outside the manufacturer's warranty period and not required as a result of a manufacturing defect, a service fee is payable. Home Service is available throughout Australia and New Zealand.

spare parts
Home Service and Spare Parts can be contacted by phone using our toll free national numbers.

warranty
Electrolux Home Products Pty Ltd and Electrolux (NZ) Ltd warrants that for domestic applications the Electrolux E:Line products featured in this brochure are free from defects in materials and workmanship for 2 years (3 months warranty for commercial applications, excluding dishwashers as they are only suitable for domestic or equivalent applications. They are not suitable for applications where health and industry requirements and regulations apply.) All warranties are subject to the conditions set out in the warranty card accompanying the product when purchased. An additional 3 year warranty is provided to cover replacement of parts for the sealed refrigeration system (domestic applications only).

The Thoughtful Design Innovator.

Do you remember the last time you opened a gift that made you say “Oh! How did you know? That’s exactly what I wanted!” That’s the kind of feeling that the designers at Electrolux seek to evoke in everyone who chooses or uses one of our products. We devote time, knowledge, and a great deal of thought to anticipating and creating the kind of appliances that our customers really need and want.

This kind of thoughtful care means innovating with insight. Not design for design’s sake, but design for the user’s sake. For us, thoughtful design means making appliances easier to use and tasks more enjoyable to perform, freeing our customers to experience that ultimate 21st century luxury, ease of mind. Our aim is to make this ease of mind more available to more people in more parts of their everyday lives, all over the world. So when we say we’re thinking of you, you know we mean just that.

The “Thinking of you” promise from Electrolux goes beyond meeting the needs of today’s consumers. It also means we’re committed to making appliances safe for the environment —now and for future generations.

Electrolux. Thinking of you.
